### ***Summary***

This document is the Engineering Release Note for the Version 2.1.4 of the Data Migration Manager (DMM).

The tool is delivered with a standalone installer DMMIPO\_2.1.4.exe to install on target Windows PC.

It can be found in the following location:

<http://bamboo.forge.avaya.com/browse/BCMDMM-TRUNKO-165/artifact>

The previous versions of the tool are not uninstalled. The user must manually uninstall this old version. Use the Windows Control Panel -> Add or Remove Programs to uninstall previous versions.

### ***Supporting information***

Work around for the IP Office gateway deployments.

Before applying BCM content to IP Office from DMM, verify the registry value of the Avaya installed Directory.

#### **Steps to follow**

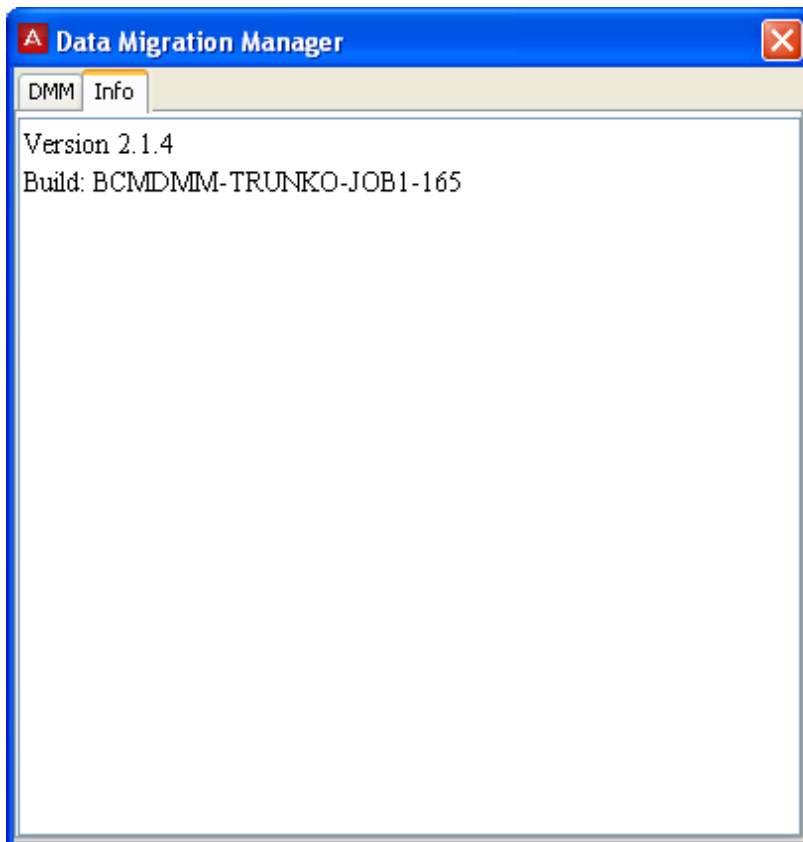

1. In command prompt, type “regedit”.
2. Registry Editor opens
3. Goto My Computer -> HKEY\_LOCAL\_MACHINE -> SOFTWARE -> Avaya
4. Check IPOffice folder is present under Avaya Folder. If so verify the name=“INSTALLDIR” value data = “C:\Program Files\Avaya\IP Office\”
5. If not, Right click on Avaya Folder, Add new key named “IPOffice”
6. Click on IPOffice Folder. On Right panel, Right click and then select “New”-> String value named “INSTALLDIR”
7. Right click and Modify value data = “C:\Program Files\Avaya\IP Office\”

### ***Supporting releases***

DMM 2.1.4 is supporting all the below mentioned release for BCM and SRG:

- BCM/SRG 200 Release 4.0
- BCM/SRG 400 Release 4.0
- BCM1000 Release 4.0
- BCM/SRG 50 Release 3.0
- BCM/SRG 50 Release 5.0
- BCM/SRG 50 Release 6.0
- BCM450 Release 1.0
- BCM450 Release 5.0
- BCM450 Release 6.0
- Norstar MICS Release 7.1
- Norstar CICS Release 7.1

### ***Load Info:***

### ***Functionality delivered***

The requirements are detailed in the SRAD Compas ID TBD.

Initial engineering testing for this release has been completed, but testing will continue in parallel with SV and customer trials.

### ***Test Results***

#### ***JIRA issues remain open in this release***

<b>Key</b>	<b>Summary</b>
IPOFFICE-16715	DMM tool support for B5800L
IPOFFICE-21958	DMM doesn't convert messages when VoiceMail type is set to Embedded - inconsistent

#### ***CQ items resolved in this release***

<b>Id</b>	<b>Headline</b>
wi00932937	DMM :IP address fields are not validated in the IP Office configuration page.
wi01013129	Documentation has to be done for DMMIPO not support lines
wi01013125	Documentation has to be done for DMMIPO not support Hunt Groups
wi01010203	DMM2.1.2 user guide figure 1 shows figure 2 in image footer

#### ***Jira items resolved in this release***

<b>Key</b>	<b>Summary</b>
IPOFFICE-25792	DMM Tool: Hunt Group has not been preserved.

### ***S/W Distribution sites***

#### **Avaya Support Site**

<https://support.avaya.com/search-landing/?query=ip+office+downloads>

### ***Required Product Documentation changes***

#### ***Run-Time Environment***

The product was tested under the following environment:

Hardware: IP 500 Core Version Core 7.0 (3)

Windows XP based host PC.
