DS-5000 Series Keyset Family Product Release

Samsung Telecommunications America is pleased to announce the general availability of the DS-5000 Series Keysets family. The new stylish two tone Keysets have a new sleek and modern cosmetic housing and appearance that can fit into most office decor. The DS-5000 Series Keyset family combines the full range of feature/functionality of the iDCS keysets, with the same sophisticated look the ITP 5100 series Keysets.

This new family of terminal equipment uses the same TDM technology as the iDCS family of Keysets. The new phones will work on any DLI (digital line interface) port of the OfficeServ 100, OfficeServ 500, OfficeServ 7200 and OfficeServ 7400 systems.

NOTE: The new DS-5000 keyset family requires software version 2.44 or higher on the OfficeServ 100 and OfficeServ 500. The OfficeServ 7200 requires software version 2.48 or higher and the OfficeServ 7400, version 3.31b to support the DS-5000 series keysets.

The new Keyset Family consists of the following hardware:

DS-5007S Keyset

- 2 line by 16 character Display
- 1 row of 7 programmable keys
- Built-in Wallmount
- Half-duplex speakerphone (Standard)
- Uses any available DLI port
- No keyset daughter boards

DS-5000 Series Keypad Family Product Release

KDB-F

- Provides Full-duplex speakerphone operation
- Compatible with DS-5014D/DS-5021D keysets

NAVIGATION KEYS

The new DS-5014D/5021D keysets with the navigation key will enhance the new features described below:

Navigation key makes the following features easier to use:

- Incoming Call Log
- Outgoing Call Log
- Directory Dialing
- Speed Dialing
- Call Forward Setting
- Alarm Clock
- Enblock Dialing (use SEND and END keys like Cell Phones)

Note: The navigation key function is not supported in the DS-5007S Model.

DS-5000 Series Keypad Family Product Release

KEYSET DAUGHTER BOARDS

Since the release of 16 port DLI cards that provides one 1B+D interface, the use of the KDB-DLI and KDB-SLI keypad daughter boards has dramatically decreased. Samsung will not make these available for the DS-5000 keypad family.

Only the KDB-F, full-duplex speakerphone module will be available as it does not require a 2B+D interface.

DOCUMENTATION & TECHNICAL MANUALS

The DS-5000 Series Keypad User Guide, Quick Reference Guide and Sales Brochure have been created for the DS-5000 Series Keypads. The General Description and the Technical manuals of the OfficeServ 100, OfficeServ 500, OfficeServ 7200, and OfficeServ 7400 have been updated to include the new keypads. These documents are available on the Technical Manual CD-ROM for the respective systems. Certain PDF of the documents are available on the GSBN website. Printed copies of the DS-5000 User Guide can be purchased online at the Samsung-FedEx Kinko's Print-on-Demand web site (<https://psg.kinkos.com/samsung>).

If you have any questions regarding this notice, please contact your Regional Sales Manager, your Customer Service Representative at the number provided below, or via email at BCS.Sales@samsung.com.
