OfficeServ^{TM} IP-UMS Version 1.4.0.7 (2012.09.11) and Client Version 3.0.1.5 (2012.05.10) New Software Release

Samsung is pleased to announce the release of version V1.4.0.7 (2012.09.12) of the OfficeServ^{TM} IP-UMS application along with Client version 3.0.1.5 (2012.05.10).

NEW SOFTWARE ENHANCEMENTS

- IP-UMS server software Version 1.4.0.7 now supports the IMAP protocol, which is now compatible with Microsoft Exchange 2010 (64 Bit) which only supports IMAP. When upgrading from previous versions of IP-UMS, WebDAV or IMAP protocols are available as an option.

- Client software V3.0.1.5 is compatible with Microsoft Outlook 2010 (64 bit).

- Client software V3.0.1.5 is compatible with Microsoft 64 bit operating systems.

- Client software V3.0.1.5 is backward compatible with earlier versions of IP-UMS application. So replacing older 32 Bit PCs with new 64 bit PCs using this new IP-UMS Client is available to your existing IP-UMS installations.

CHANGES TO FUNCTIONALITY

Text to Speech (TTS)

Earlier versions of OfficeServ IP-UMS supported text to speech (TTS) to read email messages over the phone. With the explosion of Smart Phones the need for TTS dramatically decreased. OfficeServ IP-UMS Version 1.4.0.7 discontinued TTS for reading email messages to callers.

OfficeServ™ IP-UMS Version 1.4.0.7 (2012.09.11) and Client Version 3.0.1.5 (2012.05.10) Software Release

TTS in only used for making system and automated attendant (AA) prompts. In this case TTS is not speaking directly to the caller. When the System Admin types the text for the required prompt and then presses the SAVE button the text is instantly processed and converted to either a WAV or G.729 file. After is it converted the TTS port is _**not**_ used to speak the prompt to the caller. With this change in operation it is unlikely that a user will need more than one TTS port.

When using TTS you must select a language and voice that will speak the prompt to the caller. The number of languages is licensed but the number of voices per language is not. So if you want to speak both Spanish and English, two TTS language licenses are required. English has 4 available voices and Spanish has 2. Even though there will be 6 language CDs to install you will only need to order two TTS languages, 1 for English and 1 for Spanish.

Note: TTS languages are separate from the nine languages that are included free of change with the voice mail portion of IP-UMS.

AVAILABILITY & PRICING

Both the Server and Client software are now available for download from GSBN. Please note that a **license is required** to make the software function. Only IP-UMS certified companies will be allowed to order the IP-UMS License. For assistance with installing or upgrading to the newest version contact Samsung Technical Support at 800-737-7008.

There **is no change in pricing** as currently listed on the Samsung Systems Order Form (Price List) published on GSBN.

TRAINING & CERTIFICATION

If you are currently certified on the OfficeServ^{TM} IP-UMS, a new certification will not be required. However, it is strongly advised to download the revised IP-UMS Documentation for reference when in the field.

The IP-UMS instructor led certification course has been updated to teach only this new version. Please review the training schedule for the next available P-UMS class.

If there are any questions regarding this notice, please contact your Regional Sales Manager or Samsung Technical Support via email at bcs.support@samsung.com.
