

CONNECT WITH AN ENHANCED LEVEL OF CARE

With the igeacom® Telephony-based Nurse Call Solution

SAMSUNG

A DIRECT LINE TO SUPERIOR CARE

Samsung presents igeacom® — a telephony-based nurse call solution that seamlessly integrates with the Samsung **OfficeServ™** 7000 Series platform. The power of the Samsung PBX, combined with the breakthrough technology of igeacom, provide total connectivity for your nursing home, long-term care facility, day surgical center, rehabilitation center, or other healthcare establishment.

FEATURES

- Advanced digital and analog capabilities for system diversity.
- Real-time event notification and acknowledgement optimize staff performance and improve care.
- Automated messaging system relieves staff from answering routine phone calls.
- Line-powered units eliminate the need for proprietary cabling.
- Total system supervision and integrated battery back up for uninterrupted connectivity.
- Scalable architecture protects your investment well into the future.
- Audible alerts, automated speech notification, and transmission of clinical information to signal staff.
- Intuitive operations eliminate the need for specialized training.

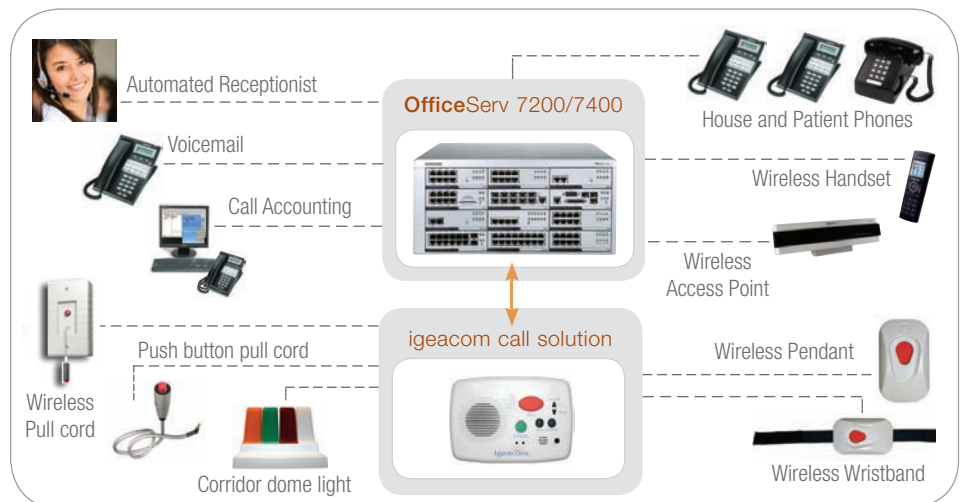

STEP UP TO SAFER & MORE EFFICIENT OPERATIONS

Traditional nurse call solutions generally consist of one system for staff, another for wireless, another for reporting and invoicing, and yet another for local and long-distance telephone services. But the igeacom system, integrated with Samsung's **OfficeServ** 7200 or 7400 platform, provides you with a single solution for all communications in your building, including nurse call, door security, telephone system, wireless and local/long distance service. One efficient system connects resident to staff, staff to staff, and staff to resident—unifying your entire facility in real time.

The igeacom units and peripherals work together with the Samsung PBX for complete in-room and facility-wide monitoring. Staff can reach each other and respond to residents' needs instantly from anywhere in the facility. Programmable buttons provide daily menus or a list of upcoming events. Wrist bands, pendants, and remote fall down and motion detectors afford mobile security as residents go about their daily activities. Safety is further enhanced through door and window contact and opener transmitters.

With this constant connectivity and security, **OfficeServ** and igeacom help to ease the worry experienced by family members and assure potential residents that your facility provides the highest quality care available.

INTEGRATING PATIENT CARE TECHNOLOGY

INCREASE PRODUCTIVITY WITH ENHANCED CONNECTIVITY

igeacom Unit and Peripherals

Wireless or hard-wired pull cords can be installed in the resident's bathroom, bedroom, or living area. The wireless version can easily be moved around the room.

Traditional bedside push button call cords are water resistant and provide instant two-way communication from resident to staff and staff to resident.

Corridor dome lights (single or multi-colored) provide additional direction to staff by indicating the location of a call.

Wireless pendants and wristbands are water resistant and provide added security via remote emergency calling.

SAMSUNG OFFICESERV PLATFORM

Phone System	Maximum Stations	Maximum Trunks	Total Ports
OfficeServ 7200	120	60	180
OfficeServ 7400	480	240	720

QUALITY CARE THROUGH INNOVATIVE TECHNOLOGY

In all types of healthcare facilities, staff response times are critical to providing quality patient care. The constant connectivity and accountability provided by igeacom and the **OfficeServ** platform gives residents and their families the peace of mind that comes from knowing they are receiving the highest quality care possible. Elevate your level of care. Choose Samsung and igeacom for the nurse call solution that's equipped to overcome today's challenges and accommodate the changes of tomorrow.

BENEFITS

- Safeguard that no call goes unanswered.
- Prioritize emergency calls by preprogramming peripherals.
- Save time and money with administrative and accounting software.
- Optimize accessibility of staff using wireless phones with automatic call dispatching.
- Alert residents to take medication with the medication reminder module.
- Respect individuals' privacy with non-intrusive technology and design.
- Improve performance and quality of care by measuring staff response time.
- Strengthen communication with family members through detailed patient reports.
- Gain a competitive edge by presenting prospective patients with proof of your efficiency and responsiveness.
