SAMSUNG

Do you need quick decision-making capabilities? Do you have several office locations or remote employees that must connect on a regular basis? Do you want to maximize relationship building between your employees and customers? We have the voice communication conference solution for you. The Samsung **OfficeServ™ Meet-Me Conference** is an enterprise-worthy solution created just for businesses like yours. Its advanced yet easy-to-use technology offers greater convenience and control as well as a huge cost savings.

► **Office**Serv Conference Manager Login

Supports multiple conferences - Up to 24 conference participants are allowed per CNF24 card. Host two conferences simultaneously with 12 participants each; six conferences with four participants each; or any combination up to 24 participants.

Works with diverse circuits - External callers can be using SIP trunks, PRI trunks and SPNet trunks.

Keep network circuits clear - Internal users connect to the conference via intercom calls. This allows you to reduce additional network charges and continue business discussions without delay.

Cost-saving embedded recording - A remarkable 50 hours of recording capacity is invaluable for those crucial conversations that may need to be referenced later. You can play, download, and forward a recorded file, and no outside recording server is required.
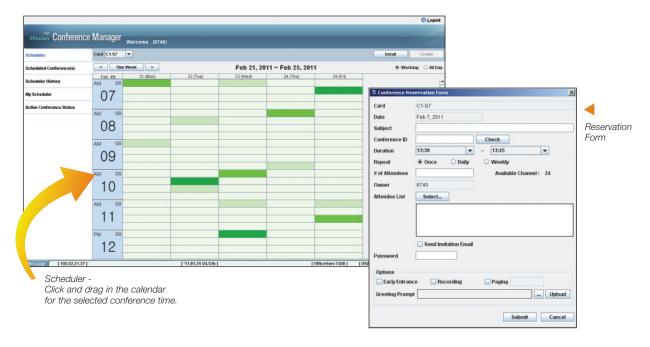

Intuitive Graphic User Interface - The Meet-Me Conference host can effortlessly supervise and manage a conference.

Simple conference set-up - Easily schedule, create, and organize a conference using the Meet-Me Conference Personal Web Page (PWP). Calendar-style scheduling system includes conference subject and ID, duration, recurring conference reservations, email invitation with add-to-calendar attachment, conference pass code, early entrance, recording and paging.

MAXIMUM CHANNEL CAPACITIES

System	Processor	Max. CNF24 cards	Max. Channels
