

The Samsung logo, consisting of the word "SAMSUNG" in a bold, sans-serif font, is enclosed within a black oval shape.

Product Bulletin

TO: ALL DCS & DCS COMPACT DEALERS
TITLE: DCS MANUAL UPDATES
ISSUED BY: PRODUCT DEPARTMENT

BULLETIN NO.: 057-DCS0
DATE: 01/30/97
NO. OF PAGES: 1

Many of you have complained about the DCS Technical Manual being poorly written in some places and that it is difficult to find the MMC you are looking for. We agree with most of your complaints. Enclosed are several MMCs that have been rewritten with much better descriptions and/or additional information.

Also included is a new Program Section without Part 2 - MMC Procedures. Notice that the Table of Contents has been arranged differently with more "parts" and different page numbers. This will allow for more efficient changes and additions to this section of the manual.

Please note that we have included two additional ways of listing the MMCs. Now you can search them in alphabetical order and by category. This will help technicians become more familiar with the DCS programs in a shorter period of time.

You can expect to receive even more manual improvements later this year when Release 3 update is issued.

As always we thank each and everyone of you for your suggestions as well as your complaints.

NOTE: Please remove old pages and insert new pages dated January 1997.
