SAMSUNG Product Bulletin

TITLE: S6TRK Card Announcement

DATE: May, 2000

ISSUED BY: Product Department

BULLETIN NO.: 079-DCS 50si

NO. OF PAGES: 1 of 1

The Samsung 50si Six Port Trunk card (S6TRK or KP70D-B6T/XAR) is nearing its release date. Many of you have expressed considerable interest in this card and its potential for enhancing the size and capabilities of the 50si system so this will come as good news for you. We plan to begin shipping this card on Monday, June 5, 2000.

Up to six cards can be installed in any of the universal card slots of a 50si system to provide a maximum of thirty six (36) analog, Loop start CO lines. This card does not affect the maximum number of station devices that may be connected to the system, this remains at 40 stations without CADENCE and 32 stations with CADENCE.

INSTALLATION NOTE: When installing this card into an existing system, be sure to follow the instructions in section 11.4 on page 11.2 of the DCS 50si installation manual update contained in this package.

To use the S6TRK you must have system ROMs dated 99.04.20 V1.1 or later. Compatible software may be ordered through STA customer service.

Enclosed in this package are the following items:

1. Product Introduction Letter
2. S6TRK Product Bulletin (this document)
3. DCS 50si Technical Manual Update
