SAMSUNG Product Bulletin

TO: ALL DCS & DCS COMPACT DEALERS   BULLETIN NO.: 056-DCS0

TITLE: MATRIX SOFTWARE   DATE: 01/30/97

     BUTTON LABEL PROGRAM   NO. OF PAGES: 1

ISSUED BY: PRODUCT DEPARTMENT

Many of you have asked for a program to label keyset designations for the DCS tele-phones. **Matrix Software Solutions** has a great Windows based product called **DESI for Windows**. We believe you will find it a great tool that makes this job easier. Use it yourself or have your end user purchase a copy for their convenience.

We have tested and confirmed compatibility of their application and designation strips with all the DCS keysets and AOM. Please note that their program includes the new 7B keyset that will be available on April 1, 1997.

From the factory Samsung includes the white designations strips trimmed in gray or black and will continue to do so. Note that the designation strips from Matrix Software are avail-able in almond for the almond keysets and soft gray for the charcoal keysets. This provides you with another option to offer your customers.

Attached is some information on the program, sample designation strips and how to order both.

Please note that Samsung Telecommunications America does not distribute, warranty or provide technical support on this product. Please contact Matrix Software Solutions.
