

November 2003

## iDCS 500 CD Documentation Update

*Issued by: Product Department*

*Bulletin No.: 105\_iDCS 500*

It has been over a year and a half since the initial release of the iDCS 500 System. As you might expect the second release of the system documentation has numerous corrections as well as new additions. The modified pages are dated after November 2001.

In the past, we have listed the sections that have been updated so you could only review the changes. This time, because of the extensive modifications, for the technicians who prefer to work with a hard copy of the manual, our suggestion is to print the whole manual, and for the ones who work with the CD, just replace your old CD with the new one.

All dealers who have purchased this CD will be receiving a replacement copy (iDCS 500-TM-2003/10) by mail.

We thank you for your suggestions and efforts to make our documentation better.
