

Bulletin No. 137\_Software\_Version\_2\_48

October 3, 2005

## iDCS 500 Release 2 and iDCS 100 Release 2: New Software Version 2.48 General Availability

Samsung Telecommunications America is pleased to announce the General Availability of system software version 2.48 for the iDCS 100 Release 2 and the iDCS 500 Release 2 systems. Beginning October 3, 2005, all iDCS 100 and iDCS 500 Release 2 systems shipped from Samsung will contain system software version 2.48. This software version is required to support the following Samsung products being released for general availability on October 3, 2005.

- *OfficeServ™ Wireless*
- *OfficeServ™ DataView Application*
- *Digital Hospitality Solution (iDHS)* (not supported on the iDCS 100 Release 2 platform)

**NOTE:** Please see separate Product Bulletins on each of these products for details.

Many technicians have already installed software version 2.48 and assisted us with testing and confirming the new software features and fixes. Samsung's Product Department would like to thank to all who helped in this effort.

### SOFTWARE COMPATIBILITY TABLES

#### iDCS 500 IP-Enabled (Release 2)

	MCP2-M	MCP2-L	SCP2	TEPRI	MGI2	MGI3	OSM Launchpad	OSM Module

## iDCS 500 Release 2 and iDCS 100 Release 2: New Software Version 2.48 General Availability

### FIXES

In addition to the new features, software version 2.48 also includes the following fixes on the iDCS 100 Release 2 and iDCS 500 Release 2 systems.

#### **Multilingual Date and Time**

When changing the station language in MMC 121, the “Date and Time” information on the second line of the display changes to reflect the chosen language (French, Spanish, etc.).

#### **Message Waiting to 8MWSLI card**

Previously, the message waiting lights would not operate when the 8MWSLI card was installed in certain iDCS 500 Release 2 configurations. This issue is corrected.

#### **Call Recording During Conferencing**

Previously, the call record LED key remained ON when a conference call was ended. This situation occurred when using the call record feature key over a PRI line. This issue is corrected.

#### **MGI Channel Lockup**

MGI channels will lockup after making a network call using QSIG over IP to another node when the called ITP Keyset is unplugged. This issue is corrected.

### OFFICESERV MANAGER

System software version 2.48 requires a new version of the OfficeServ Manager (OSM) Modules for the iDCS 100 Release 2 and iDCS 500 Release 2. These updated OSM Modules are available on the eCommerce web site (<http://ebiz.samsungusa.com>), under Technical Support, Download Software.

<b>iDCS 100 R2 OSM Module</b>	<b>v1.06 dated 2005.09.12</b>
<b>iDCS 500 R2 OSM Module</b>	<b>v3.10 dated 2005.09.12</b>

This version of OfficeServ Manager is backwards compatible with earlier versions of system software.

When using OfficeServ Manager, some MMCs may display on the PC screen that do not apply to the version of software currently running on the system. These MMC entries are reserved for future use. When this occurs, an error message of: “NO CORRESPONDING DATA” will appear on the PC screen.

## iDCS 500 Release 2 and iDCS 100 Release 2: New Software Version 2.48 General Availability

### LITERATURE AND DOCUMENTATION

#### iDCS 100 & iDCS 500 Brochure

Updated iDCS 100 and iDCS 500 brochures are available for ordering using normal Samsung ordering procedures (L-SB-100R2, L-SB-500R2). PDF files of the brochures are available on the eCommerce web site (<http://ebiz.samsungusa.com>) under the Sales & Marketing Support/Download Documents area.

#### Documentation & Technical Manual

The iDCS 500 Release 2 General Description, System Administration Guide, User Guides, Installation Guide, and Technical Manual have been updated to include all iDCS system features and functionality. These documents are available on the iDCS 500 Release 2 Technical Manual CD-ROM (L-CD-500R2). Certain PDFs of the documents are available on the eCommerce website. Printed copies can be purchased online using the Samsung-FedEx Kinko's Print-on-Demand web site (<https://psg.kinkos.com/samsung>).

**Note:** The iDCS 100 Release 2 General Description, System Administration Guide, User Guides, Installation Guide, and Technical Manual will be updated very soon. These documents will be available on the iDCS 100 Release 2 Technical Manual CD-ROM (L-CD-100R2), on the eCommerce website and via FedEx Kinko's as soon as they are ready.

### TRAINING AND CERTIFICATION

Dealers are no longer required to hold certification to sell iDCS 100 and iDCS 500 systems. However, dealers require technical training certification in order to receive Samsung technical support.

Dealers who are not certified can become certified by attending the Samsung 'iDCS Basic Plus' on-line course available through the Training Group. For additional information on Training, please visit the eCommerce web site (<http://ebiz.samsungusa.com>).

If you have any questions regarding this notice, please contact your Regional Sales Manager or Samsung Technical Support via email us at [BCS.Support@samsung.com](mailto:BCS.Support@samsung.com).
