

Bulletin No.: 187_SD_Card

February 3, 2009

OfficeServ™ 7100 Media Card Changed from MMC+ to SD

Technology will forever keep progressing. The MMC+ media card is fast becoming yesterday's news. To keep pace, Samsung now provides all OfficeServ 7100 software files for the MP10 processor on a 1GB Secure Digital (SD) card instead of the older 256MB MMC+ media card. The Media Drive on the OfficeServ MP10 card is compatible with both MMC+ and SD media cards. Consequently the net effect of this change is simply that OfficeServ 7100 software is provided on a new media card.

With this new 1GB card the available message storage increased from 52 hours to 264 hours. The SD card comes with a write protect switch. This switch must always be in the unlocked position to allow the voice mail to read prompts and write messages to the SD card.

OFFICESERV 7100 SOFTWARE

The material code (part number) has changed. The software versions are the same.

New SD Card

Material Code	STA Code	SN Prefix	Software Version
KPOS71WSD/XAR	OS7100 SD10	2TU	SYS VERS 4.22

Old MMC+ Card - **DISCONTINUED**

Material Code	STA Code	SN Prefix	Software Version
KPOS71WM1/XAR	OS7100 MMC+	2TK	SYS VERS 4.22

FEATURE ENHANCEMENTS

There are no additional features or change in operation associated with this change to a 1GB SD media card.

OS 7100 Media Change from MMC+ to SD

AVAILABILITY & PRICING

Effective February 3, 2009 all software files for the OfficeServ 7100 system will be delivered on a Secure Digital (SD) media card

The current list price of \$63.00 will be the same as the old MMC+ media card. Effective February 3, 2009 the new SD card can be ordered on GSBN. Any orders for the OfficeServ 7100 MMC+ card software already in progress but not shipped as of February 2, 2009 will be updated to include the new SD media card.

TRAINING / CERTIFICATION

The changes detailed in this bulletin will not affect your current OfficeServ 7100 certification and no additional training is required.

DOCUMENTATION

Technical documentation will be updated to reflect this change by February 9th, 2009.

COMPATIBILITY

Both the new **OS7100 SD10** (KPOS71WSD/XAR) and the previous **OS7100 MMC+** (KPOS71WM1/XAR) are compatible with the current MP10 processor cards.
