OfficeServ™ Wireless SMT-W5120 Wi-Fi Handset Product Release

Samsung Telecommunication America is pleased to announce the general availability of the new OfficeServ SMT-W5120 Wireless IP handset beginning February 18, 2010.

A great wireless handset just got better.

The SMT-W5120 handset replaces the existing SMT-W5100E handset. Due to some components were no longer available, the SMT-W5120 replaced these discontinued components with newer components. The appearance of the SMT-W5120 handset and features are identical to the SMT-W5100E handset. The model number can be found in the battery compartment. The list price remains the same as SMT-W5100E.

The following are the changes and improvements:

- Increased flash memory from 32 MB to 64 MB (for future applications)
- Newer version of PMIC chip
- Newer version of CPU
- Newer battery cell
- Newer version of charger IC
 - Lower charging current.
 - Increased battery life.
- New version of LCD
- New version of antenna

OfficeServ™ SMT-W5120 Wi-Fi Handset Release
