

Bulletin No. 237_OS_4SL2U

September 30, 2011

Availability of OfficeServ OS 4SL2U Module

Samsung is pleased to announce the general availability of the OS-4SL2U module. This four port single line analog station card replaces the 4SLM module. This module installs on the UNI card used in the OfficeServ 7100 and OfficeServ 7200-S systems.

OS 4SL2U

Direct replacement for OS SLM

New Features: This new module includes embedded DTMF receivers, CID transmitters and supports message waiting lamps. So in configurations with large numbers of SLI stations you can be assured of enough of these three resources.

The OS-4SL2U is a universal module that fits other systems not sold in the North America , hence the designation "U". So when the mounting holes are properly aligned on the UNI Card there will be 4 pins overlapping the connector. This is normal and will not affect operation of this module.

OfficeServ 4SL2U Card Availability**SYSTEM REQUIREMENTS**

The OS-4SL2U module can be used on any OS-7100 or OS-7200 that meets the following requirements.

Module	Systems	UNI Card CPLD	System Software
OS 4SL2U Card	OS7100 MP10A	V.05 08/2009	V4.41 or Higher
OS 4SL2U Card	OS7200S MP20S	V.05 08/2009	V4.45A

Note: Attempting to use the OS 4SL2U Module on a UNI Card or system software version that does not meet these requirements results in no dial tone when going off hook.

AVAILABILITY & PRICING

Effective September 29th, 2011, all orders in house for the current OS SLM with material code KPOS71BSLM/XAR will be shipped with the new OS 4SL2U module.
