

OfficeServ™ 7000 Series V4.60

New Voicemail (SVMi-20i) and Single Line Interface Cards (16SLI3, 8SLI3, 8COMBO3)

Samsung is pleased to announce the general availability of the new **SVMi-20i** voicemail card for the **OfficeServ 7200 and 7400** platforms. We are also introducing the **16SLI3, 8SLI3, and 8COMBO3** cards for the **OfficeServ 7100, 7200-S, 7200 and 7400** systems. All new cards require system software version 4.60 or higher.

ENHANCEMENTS

SVMi-20i

- Improved Resource Utilization
 - Built-In resources for communicating with IP stations and trunks.
- Improved Flexibility
 - Expandable up to 20 channels
 - Expandable up to 4 Fax channels
 - Automatic .wav file prompt conversion
 - E-Mail Gateway with SSL/TLS security
 - Secured audio streaming (sRTP to prevent hacking)
 - Local and Remote voice mail programming via Device Manager application
 - Expanded DID input from 4 to 16 digits

SVMi Comparison Table

Feature	SVMi-20i	SVMi-20E
Channel Capacity	MAX 20 ch (MAX 16 ch with sRTP) Use license to increase channels	Use daughter board to increase channels
Interface	IP/TDM Interface	TDM Interface
FAX port	4	2
