Device Manager Version V4.60f General Availability

Samsung is pleased to announce the release of standalone Device Manager version V4.60f to support the OfficeServ 7000 family of systems.

NEW FEATURES & ENHANCEMENTS

There are no new features or enhancements in Device Manager V4.60f.

BUG FIXES in Device Manager V4.60f

The following bugs in Device Manager are fixed in V4.60f:

1. In section 2.7.1, "DSP Type" was missing a selection for G.722 codex. This is fixed. The G.722 option is now available.
2. In section 4.9.1 and 4.9.2 the extender for VT key could not be entered. This is fixed.
3. When using Device Manager to program NS key with 3 digits, It always added a leading "0" digit so key would not work. This is fixed.

AVAILABILITY

The new software may be downloaded from the Samsung GSBN website by browsing to Communication >> Technical Support >> Downloads >> Released Software.

DOCUMENTATION & TRAINING

The bug fixes listed above do not require any changes to supporting documentation. This new software does not require additional certification to obtain Technical Support, if you are already certified on the OfficeServ 7000 systems.

If there are any questions regarding this notice, please contact your Regional Sales Manager or Samsung Technical Support via email at bcs.support@samsung.com.
