Manufacture Discontinuance Notice
iDCS 100 R1 Components

Introduction

Samsung Telecommunications America announces to its Authorized Dealers and Distributors the discontinuance of the iDCS 100 R1 and associated components. The discontinuance date was previously announced and took place on June 1, 2006. This notice is issued to clarify the discontinuance notice. The iDCS 100 R1 is being replaced with the OS 100. The OS 100 transition makes the move to an IP-Enabled platform and includes the processor and software to support the OfficeServ IP, Wireless, and CTI applications. The iDCS 100 R1 components are no longer available as they are no longer economical to manufacture.

Definition

This notice serves as formal communication of the Manufacturer Discontinuance of the product noted. The transition was made on June 1, 2006 and made discontinued the R1 product and replaced it with the OS 100 hardware and software. Dealer and Distributor Actions

Samsung Authorized Dealers and Distributors should be aware that all iDCS 100 systems sold and installed in the field are capable of upgrade to OS 100. The upgrade consists of the replacement of the MEM3 Card and associated EPROM software with the SMCP1 Card (with embedded software). This upgrade is required to support the addition of a MISC card or to support IP Telephony Applications, CTI Applications, or Wireless Voice/Data Applications.
