

**Bulletin No.: 2006-05**

**3/28/2006**

## **Default IP Address Information for the OS 7200**

The purpose of this Technical Bulletin is to inform all Samsung BCS dealers of the correct Default IP Address for the OS 7200 system.

If an OS 7200 system is installed without a DLI card it is necessary to know the proper Default IP Address of the MCP if an IP phone or a PC using OfficeServ Manager is to be used for programming the KSU. The technical documentation is incorrect.

The correct default IP information is listed below:

Setting	Information
IP Address	168.219.149.237
Subnet Mask	255.255.255.0
Gateway	168.219.149.1
