

Bulletin No.: 2007-05

2/20/2007

Samsung Applications Compatibility with Windows Vista

Recently Microsoft launched the newest in its line of Windows operating systems: Windows Vista. This new operating system is a significant departure from its predecessor, Windows XP. Because of the major differences it is very important to be aware of possible compatibility problems with existing software.

The purpose of this bulletin is to address compatibility issues between Windows Vista and Samsung applications. At this time all Samsung applications are undergoing testing to identify and correct any issues or incompatibilities with Windows Vista.

Until that testing is completed we recommend that you continue to run the applications listed below on systems not running the Vista operating system. Once these products have been fully certified you will be notified by Technical Bulletin.

This bulletin pertains to the following Samsung applications:

- OfficeServ Manager Launch Pad
- All releases of OfficeServ Manager
- OfficeServ WebMMC
- OfficeServ Link
- OfficeServ EasySet
- OfficeServ DataView
- OfficeServ Call
- OfficeServ Operator
- OfficeServ Softphone
- OfficeServ OpenTSP

If you have any questions about this or any other Technical Support bulletins please contact Samsung Technical Support by phone at 1-800-737-7008 or by email at: BCS.Support@Samsung.com
