# OfficeServ<sup>™</sup> 7000 Series Installation Tool Quick Setup Guide

#### What is Installation Tool?

Installation Tool is used to connect to an OfficeServ 7000 system either remotely or locally via a LAN or Modem connection for performing system programming, administration, and maintenance.

### **System Requirements**

Below are the minimum PC requirements for Installation Tool to function properly.

Component	Requirement
CPU	Pentium IV - 1 GHz or higher
RAM	512 MB RAM or higher
Hard Drive	30 MB or more free space
Operating System	Microsoft Windows <sup>™</sup> (all editions)
Modem Card (Optional)	1200 bps or faster (for Modem connection types only)
Network Interface Card (Optional)	10/100T or faster Ethernet NIC (for LAN connection types only)

## Software Installation

Software can be downloaded from the Samsung Global Business Network (GSBN) website (www.samsunggsbn.com) under Communication  $\rightarrow$  Technical Support  $\rightarrow$  Downloads  $\rightarrow$  Released Software  $\rightarrow$  Installation Tool Version 1.30a.

The software file name is V1.30a\_2008.12.08.zip

 Unzip the installation file and launch the 'Setup.exe' file. The setup preparation screen is displayed (see Figure 1). Click on [Next>] to initiate installation.

Figure 1. Installation Tool Install Wizard

On the <Choose Destination Location> screen (see Figure 2), click on [Browse...] and select the location where the program is to be installed. Click on [Next>] to continue.

## Connecting the PC to the OfficeServ

Connect the PC to the OfficeServ system via LAN or Modem connection.

- **1.** The recommended connection method is via a LAN because it is a much faster connection.
- **2.** If it is local connection, please be sure that the Internet Protocol (TCP/IP) properties of the PC matches the subnet of the OfficeServ system.

## Launching Installation Tool

- 1. There are two different ways to launch the I/T program.
  - 1.1 From the Windows Taskbar, click on [Start] → [Programs] → [Samsung Application Program Module] → 'Installation Tool'.
  - 1.2 From the desktop, double-click the 'Installation Tool' icon p. The main screen (see Figure 5) of the I/T is displayed.

Figure 5. Main Screen

Click on [System] → [Link Control] to enter the IP address of the OfficeServ system and click [Apply]. Click on [Close] to close the dialog (see Figure 6).

Click on [System] → [Connect] to connect to the OfficeServ system. Enter the correct 'ID' and 'Password' then click on [OK]. Default ID is <u>admin</u> and password is <u>samsung</u> (see Figure 7).

Note: This is not the same password that is used for KMMC programming.

4. The following screen will be displayed (see Figure 8).

Figure 8. Downloading From System Screen

**5.** The following screen will be displayed when the Installation Tool is connected to the OfficeServ system (see Figure 9).
