

October 26, 2011

Greetings,

BroadSoft is pleased to announce that the Samsung OfficeServ 7000 Series has been formally validated with BroadWorks. The device model(s) listed below have been validated as interoperable with the BroadWorks SIP interface. Any issues and limitations identified during the interoperability testing are documented in the BroadSoft Partner Configuration Guide (PCG) *PartnerConfigGuide Samsung OfficeServ 7000 Series*. The PCG is available to BroadSoft customers on the BroadSoft Xchange website, <http://xchange.broadsoft.com>.

BroadSoft validates that the device works properly with the BroadWorks SIP interface. BroadSoft does not validate qualitative aspects of the device or other device capabilities, which are outside the scope of the SIP signaling interface.

The validation covers the Samsung versions(s) and BroadWorks release listed below. Other versions and releases tested previously are documented in the PCG.

Samsung OfficeServ Models: 7030, 7070, 7100, 7200, 7400  
Samsung OfficeServ Version: V4.54a  
BroadWorks Release 17.SP3

\*This validation also applies to subsequent compatible maintenance releases to this device version.

Thanks,
